

Linking a Scopus Author profile to ORCID

Introduction

The most reliable method of uploading the publications information from Scopus to ORCID is to connect the two systems. We use the ORCID Search & Link Wizard to establish a link between your Scopus profile and your ORCID one, this can be done in both directions, from ORCID to Scopus and vice versa.

ORCID do recommend that you use the works Search and Link wizards, to import works as connecting the systems can reduce or eliminate data errors, enable reliable links between your ORCID iD and your works, and allow for the addition of contributor information with works (users can manually add their own contributor role but cannot add other contributors).

Information about adding works using Search and Link wizards, including a list of organisations that have search & link wizards you can use, can be found at [Add works by direct import from other systems](#).

Linking your ORCID profile to Scopus

1. [Login to your ORCID record](#).
2. Under Works section
3. Click on "+Add works" and then "Search & link".
4. Follow the on-screen prompts to send your papers to ORCID.

The screenshot displays the ORCID interface for the 'Works' section. At the top, there is a green header for 'Works (2)' with '+ Add' and 'Sort' options. Below this, there is a table of works. The first work is 'E-only These Submission and Preservation Workshop'. The table includes columns for 'Select all (2)', 'Items currently selected (0)', and 'Actions'. The 'Search & link' option in the 'Actions' dropdown menu is highlighted with an orange arrow. The work details include: 2022-06-20 | Conference paper | Author, DOI: 10.1145/3529372.3530918, SOURCE-WORK-ID: 273655, URI: https://eprints.gla.ac.uk/273655/, ISBN: 9781450393454, and CONTRIBUTORS: Leo Konstantelos; Ms Michelle O'Hara; Bell, Sally; Paterson, Clare; William J Nixon. The source is listed as University of Glasgow.

5. You will be asked to select your own profile from people who match your details. It can be worth checking the publication details in the “Show Record Documents” areas as sometimes Scopus can incorrectly match things, for example an incorrect subject area for an author.

Linking your Scopus profile to ORCID

1. Linking in the opposite direction is only slightly different to the process indicated above. You can find the link in your Scopus profile as you see below where the orange arrow is.

2. This will take you out to your ORCID page where you will be asked to login and then to authorise access to Scopus.
3. Once that is done you will be asked to select your profile as per steps 5 & 6 of the previous section.
